

# Executive Health and Safety Leadership 2-Day Programme

17 - 18 JULY, 2025

The Executive Health and Safety Leadership 2-Day Programme is designed to strengthen health and safety leadership for CEOs and senior executives.

Leading Safety has been delivering this programme on behalf of the Business Leaders' Health and Safety Forum since 2015.

The programme:

- Explores the mindsets and practices of world-class executive health and safety leaders;
- Focuses on personal not organisational health and safety leadership practices;
- Provides guidance to strengthen health and safety leadership practices; and
- Examines how to make these practices stick.

In addition to facilitating discussion and sharing of ideas related to health and safety leadership, *Leading Safety* provides organising frameworks and practical guidance to sharpen understanding and support effective leadership practice in each area.

Participants receive a 1:1 coaching session following the programme, the purpose of which is to debrief the 360 assessment and identify practical development actions to lift health and safety leadership performance.

2-day programme dates for 2025:  
• 17 - 18 July

Session times:  
9:00am-4:30pm (first day)  
8:30am-4:00pm (second day)
